OPENING STATEMENT OF HON. JACK REED, U.S. SENATOR FROM
 RHODE ISLAND

Chairman Reed: Let me call the hearing to order. Good morning. Today the committee meets to receive testimony on the Final Report and Recommendations of the National Commission for Military, National, and Public Service.

I want to thank our witnesses for appearing today and for their patience. The Commission actually concluded its work a year ago, and the committee had to postpone the scheduled hearing due to the pandemic. I think this past year has underscored the importance of a shared commitment to the public good and the Commission's recommendations resonate even more strongly today.

Today we will hear testimony from The Honorable Dr. Joseph Heck, who served as Chairman of the Commission, following a distinguished career in the House of Representatives, including as Chairman of the Military Personnel Subcommittee of the House Armed Services Committee. Dr. Heck also continues to serve as a Major General in the Army Reserve. Thank you General Doctor.

The Honorable Debra Wada served as Vice Chair of the Commission for Military Service, following her tenure as the Assistant Secretary of the Army for Manpower and Reserve Affairs during the Obama administration. Ms. Wada also has over a decade of service as a senior advisor and staff

1 member on the House Armed Services Committee.

And finally today, Mr. Alan Khazei served as a Commissioner on the Commission, and has extensive background in national service programs. Mr. Khazei is the founder and former CEO of City Year, a precursor to and model for today's AmeriCorps program.

7 I must also give a shout-out to Mark Gearan, who was 8 the Vice Chairman. Mark was a former Director of the Peace 9 Corps and the President of Hobart College, and he, along 10 with Chairman Heck, did a superb job, along with all the 11 Commissioners.

12 The importance of the Commission's work cannot be 13 overstated. As many of my colleagues will recall, the 14 immediate legislative concern that gave rise to the 15 Commission was the military Selective Service System, and 16 whether it continues to meet the needs of the nation today. 17 In addition, when the Department of Defense opened all 18 military positions to service by women in 2016, the question 19 was raised whether women should register for the Selective 20 Service, and if there were constitutional concerns if women were not required to register. As I stated then, I believe 21 22 that women should be included in military Selective Service. 23 In testimony before this Committee, past military service 24 chiefs testified to their personal opinion that women should 25 be required to register for the draft.

Alderson Trustpoint Company

1 Beyond the issue of the Selective Service, the 2 Commission also explored "the means by which to foster a 3 greater attitude and ethos of service among United States 4 youth, including an increased propensity for military 5 service." This is an increasingly urgent matter. Today, б barely 25 percent of America's youth aged 17 to 24 meet 7 military entrance requirements. Furthermore, the most 8 recent data from the Defense Department reveals that only 10 9 percent of youth now show a propensity to serve in the 10 military, and this figure continues to drop, raising the 11 question of how the military services can meet future 12 recruiting missions without sacrificing quality.

13 Of course, as this panel well knows, the issue of 14 service is more fundamental than the question of who is 15 required to register for military service. It is a question 16 of who is expected to serve, who wants to serve, and who 17 will have the opportunity to serve, not just in the military 18 but in national and public service as well. These are 19 questions of our national character and aspirations, and 20 that is why we expanded the Commission's mandate to include 21 national and public service.

The 2003 Report of the National Commission on Public Service, a predecessor report, otherwise known as the Volcker Report, stated the problem well: "The notion of public service, once a noble calling proudly pursued by the

1 most talented Americans of every generation, draws an
2 indifferent response from today's youth and repels many of
3 the country's leading private citizens."

4 The challenge remains ever more urgent today. Years of 5 budget constraints has led to furloughs, wage stagnation, б and low morale among the Federal public sector workforce. 7 Likewise, national service programs such as AmeriCorps, the Peace Corps, and the Senior Corps are funded today at levels 8 9 that fail to match demand, even as the need is greater today 10 than it has ever been. Our national service infrastructure, 11 from the military to the Corporation for National and 12 Community Service, have been working tirelessly during the 13 pandemic to provide testing, vaccinations, contact tracing, 14 even food distribution.

We, as a government, must be prepared to invest in what is truly our nation's great asset. Those are our public and community servants. Service to others and the nation, whether it be military, national, or public service, is a healing, unifying, and patriotic act that we need a lot more of today, not less.

I thank our witnesses again, as well as all of the commissioners and staff of the national Service Commission for their work, their bold ideas, and their call to action for a better America and a more hopeful and optimistic future rooted in service, and I look forward to their

1 testimony.

2	Senator	Inhofe,	please.

STATEMENT OF HON. JAMES INHOFE, U.S. SENATOR FROM
 OKLAHOMA

3 Senator Inhofe: Thank you, Mr. Chairman. I commend 4 you for holding this hearing today and I am very interested 5 in the report of the National Commission -- I quess there 6 are three reports. I am not sure what I am looking at here, 7 but we will sure find out -- and the recommendations that will come with them. The report must be subject to an open 8 9 debate. We need to get everybody in on this deal. And I 10 think the American people deserve that, and the hearing 11 today is an excellent start.

12 Chairman Heck and Vice -- I am going to make sure I am 13 pronouncing this right, but Vice Chairman Wada -- orM, Wadu? 14 Somebody help me.

15 Voice: Wada.

16 Senator Inhofe: Wada. Okay -- and Commissioner 17 Khazei, welcome, and I am glad you are here today. I want 18 to thank all the commissioners for the hard work and the 19 commitment that you have that is plain in every page of your 20 report. Your work is important to the future of our 21 national security.

And I have got kind of a unique perspective, because I was the product of the draft. That was a time when I did not want to be drafted, and I was a mess. I honestly do not think I would be alive today if it had not been for the time

that I spent. And I look at all the problems that we have with young people today, and I think, you know, if they had gone through a basic training, the way it was in the good old days and all that, I just think that would resolve a lot of the problems that we have.

б So I have to admit, I come to this meeting with a bias. 7 Even our current crisis shows that spirit of service is part of being an American, but we must do a better job of 8 educating people about what it means to be a citizen of this 9 10 great nation. We also need to inform people about the many 11 opportunities to serve, whether in the military, civil 12 service, or local communities, and the benefits of such 13 service to themselves and to others. So I look forward to 14 this meeting.

15 Thank you, Mr. Chairman.

16 Chairman Reed: Well, thank you very much, Chairman 17 Inhofe, and now Ranking Member Inhofe, for your 18 participation, because you were here when we put this 19 Commission together and you contributed immensely. Thank 20 you.

Now I am going to turn to Dr. Heck for his statement, who I understand will deliver the statement for the entire panel, using the time that would normally be assigned to each witness. Dr. Heck, please.

25

1 STATEMENT OF THE HONORABLE JOSEPH J. HECK, CHAIRMAN Dr. Heck: Thank you. Chairman Reed, Ranking Member 2 3 Inhofe, and members of the committee, on behalf of all of 4 the commissioners and our dedicated and talented staff, my 5 colleagues and I thank you for the opportunity to appear before you today to discuss the findings of the National б 7 Commission on Military, National, and Public Service. At 8 your desk you have three documents, as Senator Inhofe 9 pointed out -- the full report, an executive summary, and 10 then a legislative annex.

11 Congress charged the Commission to review the military Selective Service system, and perhaps more importantly, 12 13 identify ways to increase Americans' participation in 14 military, national, and public service in order to address 15 the needs of the nation. Last march, we were honored to 16 submit our report, "Inspired to Serve," to Congress, the President, and the American people. Our work culminated in 17 18 164 discrete recommendations, reflecting the first 19 comprehensive and holistic review of the Selective Service 20 System and all forms of service in U.S. history.

Inspired to Serve" reflects 2 1/2 years of extensive research, public hearings, and conversations with Americans from all across the country. As part of our work, the Commission visited 22 states across all 9 census districts.

neighborhoods, and rural towns. We spoke with elected 1 2 leaders, nonprofit organizations, faith-based communities, 3 military officers and enlisted, middle school, high school, 4 and college students, those who serve and those who do not. 5 We engaged with 530 organizations, held 11 public meetings б and forums, analyzed thousands of public comments, leveraged 7 multiple surveys, and convened 14 public hearings to discuss 8 and analyze a wide variety of policy proposals.

9 In this time of nationwide crisis, we bring a good-news 10 story. America's extraordinary and long-standing spirit of 11 service continues to shape the life of our nation. We also 12 bring an opportunity. In a country of 330 million people, 13 only 11 percent of the adult population engages in sustained 14 national service, leaving the extraordinary potential for 15 service largely untapped.

Our recommendations offer a bold vision and a comprehensive plan that will nurture the spirit of service that currently exists into a culture of service, that by 2031, the 70th anniversary of President Kennedy's call to ask not what your country can do for you but what you can do for your country, we have an expectation that all Americans will engage in some form of service.

The coronavirus pandemic has made clear that the United States must have a robust, tested infrastructure, capable of mobilizing the nation in emergency situations. We need

experts in government at all levels with the skill and experience to address the unexpected. We need the talents and commitment of individual Americans and the resources of the private sector to mobilize a whole-of-society effort in times of crisis.

6 The Commission's recommendations aim to strengthen all 7 forms of service to meet domestic and national security 8 needs, including policies that would enhance our ability to 9 respond to national emergencies. I will briefly address the 10 highlights of each area, and we are prepared to go into 11 detail in the questions and answers.

12 As a nation, we must improve the readiness of the 13 national mobilization system through whole-of-government 14 leadership, regular exercises, and improved public 15 awareness. Our recommendations would require the Department 16 of Defense and the Selective Service System to conduct 17 regular exercises, improve public awareness, and identify 18 officials at Defense and in the National Security Council to 19 lead mobilization planning and response to a range of 20 national emergencies.

One piece of this is the military Selective Service System. The nation must be prepared to address unforeseen existential threats. After extensive research, deliberation, discussion with experts and the American public, we recommend that the United States maintain the

Selective Service System. It is a low-cost insurance policy
 to supplement military personnel requirements in the face of
 a national emergency.

4 However, the system does require modification. Most 5 significantly, in the event of a draft, the nation must б leverage the skills and talents of all Americans, regardless 7 of gender. Including women in Selective Service registration is what the national security interests of the 8 9 United States demand. It will improve the ability of the 10 military to maintain higher standards in the even 11 conscription is ever needed.

12 Removing oneself from the emotion, passion, and 13 convictions deeply held by opponents and proponents on this 14 issue, this decision ultimately comes down to two factors: 15 standards and equity. At a time, as you pointed out, Mr. 16 Chairman, when nearly 70 percent of 17- to 24-year-olds will 17 fail to meet initial military accession standards, we cannot 18 afford to exclude half the population, the female half, from 19 the potential pool of inductees. If a draft is enacted, we 20 should want to ensure that as many people of the highest 21 quality can serve, those who are more likely to compete 22 training successfully and be more proficient at their jobs. 23 Expanding draft eligibility to women is, therefore, an issue of standards, not gender. Expansion will strengthen 24

25 U.S. national security and mitigate the risks imposed by an

unforeseen future. It will enable the military to access the most qualified individuals, regardless of sex, to fulfill the variety of positions necessary to respond to an ever-changing threat environment, and provide all Americans an opportunity to meet their civic obligations.

б The rights and freedoms that come with being an 7 American citizen are accompanied by responsibilities, including the defense of the nation. Selective Service 8 9 registration presupposes this common obligation to provide 10 for the common defense. Consequently, the disparate 11 treatment of women in the context of the Selective Service 12 System unacceptably bars women from sharing in this 13 fundamental civic obligation. Male-only registration sends 14 a message to women that they are not vital to the defense of 15 the country and that they are not expected to participate in 16 defending it. Hence, requiring women to register and 17 perhaps be drafted affirms registration as a common civic duty. America is simply stronger when we all engage in the 18 19 obligations of citizenship.

Extending registration also furthers a key goal of the interim national security strategy just issued by the White House earlier this month to, quote, "modernize our national security institutions and processes while ensuring we take advantage of the full diversity of talents required to address today's complex challenges," end quote.

1 We also recommend measures to enhance the tradition of 2 voluntary military service by creating a continuum between 3 the routine recruiting mechanisms of the U.S. military and a 4 dire situation that may require activation of the draft. 5 For example, creating a critical skills, individual ready б reserve of Americans without prior military experience, who 7 would immediately join as their skill sets are needed; creating a civilian cybersecurity reserve of former 8 9 government cyber experts to provide DHS and NSA with surge 10 capacity; a national roster of individuals ready to 11 volunteer in a national, state, or local emergency; and a 12 formal presidential call for volunteers to join the military 13 prior to initiating a draft.

14 We also identified critical trends that indicate a 15 deepening of the civil-military divide and raise concerns 16 about the long-term sustainability of the all-volunteer 17 force. First, gaps in understanding and interaction between 18 civilian and military communities have grown as a smaller 19 percentage of Americans participate in military service. 20 Second, enlisted recruiting remains uneven across the United 21 States, with certain geographic regions furnishing a 22 disproportionate share of recruits. Third, less than 30 23 percent of American youth are eligible to join the military without a waiver, and even fewer are interested. 24

25

www.trustpoint.one www.aldersonreporting.com

Among our recommendations are the Department of Defense

joining with additional funding from Congress to increase
investment of recruiting resources in under-represented
markets and hometown recruiting programs; expanding youth
citizenship programs, such as JROTC; and encouraging broader
use of tools, such as the Armed Services Vocational Aptitude
Battery Career Exploration Program.

7 We were pleased to see that the FY 2021 NDAA adopted our recommendation to include an introduction to military, 8 9 national, and public service opportunities in existing JROTC 10 programs. These and other recommendations would increase 11 awareness of the realities of military life and engagement 12 between the military and the broader American public, enhancing the military's ability to attract and retain 13 14 qualified personnel.

15 Moving to public service, we recognize that public 16 servants are vital to the security and well-being of the 17 nation. The current public health crisis has made this 18 abundantly clear to all of us. With just 6 percent of the 19 Federal workforce under 30 years of age, and more than a 20 third eligible to retire in the next five years, agencies must attract the next generation of public service. Yet 21 22 basic hiring processes are dysfunctional. Most agencies 23 lack effective internship programs, flexibility in benefits 24 is not competitive with the private sector, and piecemeal 25 special hiring authorities have proliferated without

sustainable fixes to the overall personnel system. To fix
 Federal hiring, we propose ways to transform recruiting,
 improve internships, attract and retain critical talent,
 modernize benefits, and create new pipelines to public
 service.

б We also propose critical improvements to help bring 7 more talented military veterans into public service. Our 8 recommendations would make veterans preferences a tiebreaker 9 between equally qualified candidates, refocus the preference 10 on recently discharged veterans transitioning to civilian 11 employment, and expand eligibility for the veterans' 12 recruitment appointment from the current 3 years to 10 years 13 after discharge.

14 In national service, the Federal Government supports 15 more than 300,000 positions annually through AmeriCorps, 16 Peace Corps, YouthBuild, and other programs, national 17 service volunteers who roll up their sleeves and help meet 18 the critical needs of the nation. They provide critical 19 disaster relief support, combat the opioid crisis, preserve 20 parks and public lands, teach public school students in low-21 resourced communities, and much more. Yet, most Americans 22 do not know what national service is or how to get involved. 23 Nearly one-third of millennials state that they are unaware 24 of existing national service opportunities.

25

Our recommendations promote awareness of national

1 service and link recruiting efforts between military and 2 national service, such that aspiring individuals who are 3 ineligible for service in one type of program can learn 4 about opportunities in the other. We propose ways to 5 improve benefits to attract more Americans to this important б work, and recommend continued enhancements to the national service infrastructure. Our goal is that national service 7 opportunities will grow to 1 million annually by the year 8 9 2031. To help achieve this goal, the Commission has 10 proposed a new, ground-breaking national service fellowship 11 program that would let individuals choose where they want to 12 serve, allowing more community, faith-based, and other nonprofit organizations, especially those in rural, tribal, 13 14 or under-resourced areas to participate.

15 Our work also illuminated the need for better 16 coordination of service efforts among the various agencies 17 and organizations involved in managing and overseeing 18 service activities. I highlight two of our recommendations 19 designed to address this. First is establishing an 20 interagency council in the White House that would elevate 21 all streams of service and provide a forum for encouraging 22 coordination and communications. Second is creating an 23 online platform that can function as a one-stop shop for 24 service opportunities, a virtual clearing house that would 25 connect service organizations with potential talent, and

Alderson® ATrustpoint Company

would provide immeasurable benefits for individual Americans
 and organization in military, national, and public service.

3 When we began this journey, we did not expect to hear 4 passionate calls from Americans across the country to 5 improve civic education, but we did, and loudly. And we б also learned about the dire condition of civic education in 7 America and the promise of integrating service learning 8 methods into teaching. To that end, the Commission has 9 recommended that Congress make a significant financial 10 commitment to jumpstart a nationwide revitalization of civic 11 education and service learning to ensure young people are 12 equipped with the knowledge, skills, and dispositions to 13 actively participate in civic life and understand the 14 importance of serving one nation and community.

15 In closing, on behalf of this Commission, we call on 16 the Congress and the President to invest in the American 17 people and the security of the nation by taking action, bold 18 action, to ensure that every American has a clear and 19 supported path to service. We believe that now is the time 20 to build a new culture of service and strengthen our 21 republic, one in which every American is inspired and eager 22 to serve.

We thank you again for the opportunity to appear herebefore you. We look forward to your questions.

1 Chairman Reed: Well, thank you, Dr. Heck, for that 2 very compelling statement, and because some of our 3 colleagues are virtually participating, let me once again 4 explain our procedures.

5 Since it is impossible to know exactly when our б colleagues who will be joining via the computer arrive, we 7 will not be following our standard early bird timing rule. 8 Instead, we handle the order of questions by seniority, 9 alternating sides, until we have gone through everyone. 10 Once we reach the end, if there is anyone we missed we will 11 start back at the top of the list and continue until 12 everyone has had their turn.

We will do the standard five-minute rounds. I ask my colleagues on the computers, and at their desk, to please keep an eye on the clock, which you should see on your screens.

Finally, to allow for everyone to be heard, whether in the room or on the computer, I ask all colleagues to please mute your microphone when not speaking.

In addition, the committee has received a statement for the record from the Service Year Alliance, and I would request that it be made part of the record. Without objection, it is part of the record

24 [The information referred to follows:]

25 [COMMITTEE INSERT]

1 Chairman Reed: Thank you again, Dr. Heck, for your 2 compelling testimony and also for the extraordinary report 3 that you rendered, the ideas and the analysis you put 4 forward. I can assure you it will be carefully reviewed and 5 we hope, in large part, incorporated into the next national б defense bill after appropriate review and debate. But thank you. You have made a significant contribution, you and your 7 8 colleagues.

9 Let me ask a question, Dr. Heck. Do you believe that 10 the current accession standards and entrance testing methods 11 are appropriate to fuel the force we need over the next 25 12 years?

Dr. Heck: Thank you for the question, Mr. Chairman. 13 14 The Commission did not delve into the issue of actual 15 accession standards. We felt that the standards are best 16 designed and vetted through the Department of Defense. What 17 we concentrated on was how could we get more individual 18 interested in serving in the military, with the belief that 19 if more are interested then regardless of what the standard, 20 more will meet the standard and more will participate.

21 Chairman Reed: I recognize that. I think one of the 22 comments you made, and it tracks my thinking, is today there 23 are some military specialties much different than when I was 24 serving. To be a drone operator does not require some of 25 the same physical capacities of some other issues that it

took to be an infantry officer or a naval officer, et cetera. And think you are right to point out that it should be considered by the services, and we will look to them for their advice.

5 Ms. Wada, the question that has been raised about the 6 Commission, and again, in Dr. Heck's testimony, is how do we 7 increase the propensity of young people to serve in the 8 military? We have a shrinking cohort, so we have to do much 9 better. So your ideas, as a commissioner.

10 Ms. Wada: Certainly, sir. The Commission looked at 11 how we can better engage with the communities across this 12 country, and what we believe is that integrating both all 13 three lines of service would actually open up opportunities 14 to engage with young Americans today. There are many 15 communities in this country that military recruiters are 16 having a difficult time getting into, but yet those same communities will welcome national service opportunities. 17 18 And if we combined all the service lines so that we 19 provided, educated, informed, processes for our young 20 Americans to consider all lines of service, we believe that 21 we could increase propensity.

22 Chairman Reed: I think that is good advice, and more 23 collaboration between the national service reps and the 24 military reps would be appropriate and something that we 25 will pursue.

1 I was struck when Senator Inhofe asked how to pronounce 2 your name. I was going to say it is easy. It just like we 3 say in New England, "Wada under the dam." Forgive me. 4 Mr. Khazei, we want to focus on expanding participation 5 not just in the military but through the charge that was 6 given for national and public service. Your experience with 7 City Year gives you a very special perspective. Can you talk to us about how we can expand national and public 8 service? 9 10 Mr. Khazei: Thank you, Chairman. Is it on now? 11 Chairman Reed: It is not on yet, sir. 12 Mr. Khazei: It is not going on. Sir, it is not going 13 on. 14 Chairman Reed: You have got it now, I think. 15 Mr. Khazei: Is it on now? 16 Chairman Reed: You are on now. 17 Mr. Khazei: Sorry about that. 18 Chairman Reed: Thank you, sir. 19 Mr. Khazei: Chairman, thank you for your question. As 20 we traveled the country we found that there was an 21 incredible desire to serve but a lot of people do not know 22 about the opportunities to serve, and so we made a number of 23 recommendations. One is that there should be a new call to 24 service, and as my colleague said, linking military, 25 national, and public service. We also think that there

Alderson®

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) should be a new portal, a technological website, a one-stop shop, where you can learn about different opportunities to serve. We also think that we need to increase the benefits, as was recently done in the American Rescue Plan and is proposed in the CORE Act, which I know you are a co-sponsor of, for especially more low-income youth to be able to serve. We made a number of recommendations.

8 We think that already there are more people who want to 9 serve than there are positions, but with the right national 10 strategy and a national call to service the desire to serve 11 is tremendous. Young people of this generation, Generation 12 Z -- my daughter is one -- is the most idealistic, they are 13 the most serving, but if they see that there are 14 opportunities we believe they will sign up in droves.

15 Chairman Reed: Thank you very much. Just a final 16 point. My experience in trying to engage and encourage 17 service, one of the points with the schools systems, and 18 particularly the guidance counselors do not seem to be as 19 knowledgeable and engaged as they should be, and that is 20 something that you might have touched on in the Commission 21 report. But they are sort of an asset that is there. I 22 would think that talking to students, letting them know all 23 the options of service, the options for education, et 24 cetera, my sense is that is the resource we have not 25 developed enough. So we will also consider that.

Alderson®

Once again, thank you for your superb work. Senator
 Inhofe.

3 Senator Inhofe: Thank you, Mr. Chairman. The 4 Commission's report urges to create a widespread culture of 5 service for Americans, but all backgrounds, again, expect б and inspired to serve the nation and all that. Now, Dr. 7 Heck, in light of that, what was the thinking behind the 8 Commission's decision not to recommend that Americans be 9 required to serve the nation in some way? You know, in my 10 opening statement I made it real clear that it is something 11 I would not have done, but I did, and I had a happy ending. 12 So what went into that decision?

Dr. Heck: Thank you, Senator Inhofe. So while the 13 14 Commission believes in the value of service to individuals 15 and the nation it ultimately concluded that policymakers 16 should make every effort to promote voluntary approaches to 17 service, and this is primarily looking at the intangible 18 benefits that come with the spirit of volunteerism. In 19 addition, when you look at trying to make service, in 20 whatever form, mandatory, certainly for military service 21 there is a constitutional requirement under Article I, 22 Section 8, to raise and support armies, provide and maintain 23 navies. There was concern about constitutionality of 24 forcing individuals into other forms of service against 25 their will.

Alderson Trustpoint Company

Perhaps a bigger issue, however, is the incumbent costs, if you were to make mandatory service something that was a universal requirement. Roughly 210 million adults in the U.S. population today, we could not afford 210 million service opportunities. And we, again, go back to the importance of the volunteer spirit in providing service, whether it is at the local, state, or Federal level.

8 Senator Inhofe: Okay. I understand that. But in your 9 deliberation on that did you study what Israel has been 10 doing for so many years, and how successful, in my opinion, 11 that has been?

12 Dr. Heck: Yes, sir. We actually studied several 13 foreign nations and their systems that have some form of 14 mandatory service, and, in fact, met with representatives 15 from their respective embassies. Israel, sir, is a much 16 smaller country in population. In addition, if you talk to 17 the Department of Defense, they will echo the fact that at 18 no point in time have we had such a professional force as we 19 have now, with an all-volunteer force. And there are 20 concerns about rotating people in for a one-year 21 conscription, putting them through boot camp, and then 22 having them leave the service.

23 Senator Inhofe: So you did consider that. Ms. Wada, I 24 would say one of the things that was probably most 25 controversial in your efforts was the decision that young

1 women should be required to register in the system alongside 2 men. Was that difficult? Did you have a lot of opposition 3 to that position?

Ms. Wada: Thank you, Senator. The Commission did hear from a number of organizations and individuals about the different perspectives they brought. Ultimately, the Commission decided that it was based on standards and that men and women are equally qualified to meet --

9 Senator Inhofe: But was there opposition to that?
 10 Ms. Wada: There was some. There was also a number of
 11 --

Senator Inhofe: Yeah, I would think there would be,and frankly, I am glad you did.

14 Now the most important thing, in my opinion, is the 15 problem that we have got right now with the fact that such a 16 small percentage of our young people qualify. You know, we 17 have a Personnel Subcommittee of this committee that you are 18 before right now, and this has probably been the thing that 19 has been studied for a long period of time, and even our 20 military have a difficult time coming up with, you know, one 21 of the choices would be to lower the standards, one of the 22 choices -- there are a lot of little obvious things that 23 could be done.

But do you have anything that you have done that is going to address the problem that we just do not have enough

1 kids out there?

2 Ms. Wada: The Commission looked at the number of 3 individuals who were qualified to meet the current accession 4 standards, and the Commission found that both men and women 5 were equally qualified to meet it, and that percentage was б 29 percent. In actuality, it was 29 percent for males and 7 it was 29.3 percent for females. So statistically, both men 8 and women, if were called to register and potentially 9 considered for a draft, both men and women would be equally 10 qualified to meet the current accession standards. 11 Senator Inhofe: Well, Mr. Khazei, you know, that is 12 fine, but that is the problem that we are going to be facing. We have China and we have Russia, know the 13 14 capacities that they have. Mr. Khazei, do you have any 15 comments to make on that? Mr. Khazei: Yes. I think one of our big 16 recommendations is that we need a new call to service 17 18 overall, and the brilliance of this Commission was that it 19 links all three branches of service -- military, national, 20 and public. And I think if we had a new almost like updated 21 "Uncle Sam Needs You" campaign, and gave young people the 22 option, and educated them about the different choices, and 23 if we linked to recruiting efforts I think more young people 24 would sign up to serve in public service, military service, 25 and national service.

Alderson Trustpoint Company

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) And if I could just make one point quickly, Senator, about your mandatory point. You know, we had a robust debate on this. If you look at the development of high school in America, it took about three decades. The first high school was voluntary and then it got to a critical mass and people said, "You know what? Everybody should go to high school."

8 We have a robust recommendation which is to get to a 9 million young people in national service within 10 years. 10 At that point, it would be across the country enough that I 11 think we could have the debate that you want to have. Now, 12 should we make this mandatory? There is also the practical 13 issue that if you went from where we are now, which is less 14 than 100,000 people, to 4 million, would the service 15 opportunities be quality service opportunities? We do not 16 want people in service where they are not having an impact. 17 So I think if the recommendation to get to 1 million is 18 adopted, then the country really could have the kind of 19 debate that you are pushing for.

20 Senator Inhofe: Yeah. Okay. Well, thank you, Mr.21 Chairman.

Chairman Reed: Thank you very much, Senator Inhofe.
And let me recognize Senator Gillibrand via Webex.
Obviously we have a technical issue. Senator
Blumenthal, please.

Senator Blumenthal: Thank you very much, Mr. Chairman.
 Thank you for your excellent work.

Senator Gillibrand: I thought they were calling on -Chairman Reed: Senator Gillibrand, are you on Webex
now? You were not. Could I ask you to defer? We
recognized Senator Blumenthal and I will recognize you next,
when your order comes up. Thank you.

8 Senator Gillibrand: Yes, sir. Thank you.

9 Senator Blumenthal: Thanks, Mr. Chairman. Thank you,
10 Senator Gillibrand.

11 This untapped opportunity is tremendously exciting, and 12 part of it is that we are recognizing for the first time, as 13 public service, folks who do seemingly ordinary tasks under 14 extraordinary challenges, whether it is postal workers or 15 bus drivers or grocery workers, because of the challenges 16 that we have faced over the last year in the midst of a 17 pandemic. And I am particularly interested in what can be 18 done in the military to attract more women, and keep them in 19 the military. There is a story in The New York Times, 20 today, I think, about the physical fitness tests that the 21 military imposes. In the course of your work did you 22 develop any opinions about how that fitness test impacts 23 either attracting or retaining women in the military? 24 Ms. Wada: Senator, thank you for the question. No, 25 the Commission did not look at the -- are you referring to

Alderson®

1 the Army's ACT, the new physical fitness?

2

Senator Blumenthal: Yes.

3 Ms. Wada: No. The Commission did not take a look at 4 that issue. The Commission did look, though, at how we 5 could increase propensity for individuals to serve, and what б we found was young individuals across this country lack 7 basic knowledge of the military and the opportunities that it provides. A lot of young Americans today believe that 8 9 the majority of people in the military are what we would 10 call ground-pounders or infantrymen, not recognizing the 11 fact that we have everything from doctors to lawyers to 12 musicians in the military, and they have professional opportunities available to them, that they are now well 13 14 known.

15 Senator Blumenthal: Would you agree that educating 16 them about the specific skills that are necessary and also 17 tailoring military requirements to attract those skills, for 18 example, cyber warriors, who may have different interests, 19 different style, different culture, but the military needs 20 them.

Ms. Wada: Correct. So one of the issues that the Commission looked at was how do we increase propensity for critical skills, and we have included a number of recommendations to do that. What I would say is that it is not only recruiting those individuals with critical skills.

1 It is also having the pathway and also the processes to be 2 able to keep them once they are in, as well. And so the 3 process needs to be looked at holistically.

4 Senator Blumenthal: What about student loan 5 forgiveness? Is that an option here that should be expanded б further?

7 Ms. Wada: We looked at benefits, in general. I do not recall that we came out on any specific recommendation on 8 9 student loans, specifically.

10 Senator Blumenthal: Well, there is an option now to 11 have student loans forgiven. I hate that word, because it 12 makes it sound like an act of beneficence. But people who 13 do public service are actually contributing, and, in effect, 14 paying off their student loan. But one of the proposals 15 that I and others have advocated, that I think would be 16 extremely attractive to national service, is expanding the 17 options that are available so that people with huge amounts 18 of student debt can better reduce that debt in return for 19 public service. So that is not something you have explored? 20 The Commission did include a Ms. Wada: No. 21 recommendation that would actually start a scholarship 22 program and encourage centers of excellence for public 23 service, and start a scholarship program on the national 24 service level that would allow people to choose where they want to provide their service, and part of national service 25

Alderson A Trustpoint Company

1 also comes with some college stipend money, depending on the 2 program.

3 Dr. Heck: Senator, if I may, so the committee does 4 have a recommendation to create a public service corps, 5 similar to the ROTC program, where there would be an upб front scholarship program in exchange for someone agreeing 7 to serve in a Federal public service role upon graduation. 8 Senator Blumenthal: But what I am contemplating, in 9 effect, is, you know, a reverse GI Bill, in effect, where 10 someone does the public service and can reduce the debt, not 11 through a scholarship while in school but through service 12 afterwards. It already exists but it is under pretty 13 curtailed or limited circumstances, and widening it, 14 broadening it I think would greatly encourage public 15 service. My time has expired. I apologize, but I would love to 16

17 follow up in questions. Thank you.

18 Chairman Reed: Thank you, Senator Blumenthal. Let me 19 recognize Senator Ernst.

20 Senator Ernst: Thank you very much. It is good to 21 have our witnesses in front of us. Dr. Heck, great to see 22 you. Ms. Wada, thank you, and Commissioner, thank you as 23 well for the great service that you have provided with this 24 study.

www.trustpoint.one

www.aldersonreporting.com

25

Alderson A Trustpoint Company

It is good to be able to visit with you today.

There

1 are a number of issues out there. I think all of us will 2 have different views on whether women should be included in 3 the draft. I am okay with that, since we have opened up 4 those combat skills to women serving in the military. I do 5 think that that is entirely appropriate. I am very proud of б the 23-plus years that I had in boots, and am very excited 7 that my daughter has decided to follow in my footsteps and put those boots on as well. 8

9 So just going to the civic education of our young men 10 and women. One thing from back home that I have been very 11 surprised about is that many of our school counselors do not 12 even offer the opportunity, when they are reviewing 13 scholarships with their high school students, many of them 14 do not bring up the fact that ROTC offers scholarships to 15 any number of our fine higher learning institutes. And so I 16 find that very discouraging that we are not opening that 17 opportunity to so many. And even my daughter had said, at 18 one point, she had heard one counselor say, "Oh, well, we do 19 not go over that because nobody will be interested." Well, 20 you do not know that those students are not interested 21 unless you actually propose it to them.

I also know of a number of high schools across Iowa that do not allow National Guard recruiters to come into their schools, and I think this is a great disservice by our public high schools when they are not offering career

Alderson®

1 choices of varying degrees to their students.

So I would hope that those that are listening out there might decide that, wow, we are cutting careers away from our students by not offering that opportunity. Whether they agree with military service or not, it is not up to our schools to decide what career path our students engage in. So hopefully we can bring that to light as well.

Now there was a Brookings report from June of 2020 that 8 stated, and I do agree, that "Americans' participation in 9 civic life is essential to sustaining our democratic form of 10 11 government. Without it, a government of the people, by the 12 people, and for the people will not last." This report 13 found that one in four Americans were unable to name the 14 three branches of government, and this report, admittedly, 15 shocked me.

16 So how can we reinvigorate civic education within our 17 schools and amongst our nation's youth, and then, of course, 18 just understanding our democracy is very important and 19 critical in today's society. We struggle with this issue, 20 but how can we get more of that civic engagement in our high 21 schools? Any of you, please.

Mr. Khazei: Senator, thank you for your service, and your daughter's, and highlighting this issue. Just to respond somewhat to what you said, we did recommend that JROTC should be expanded and that part of the curriculum

should also include opportunities to serve in public service and civilian national service, and we appreciate that this committee actually put that instruction in your last NDAA, and now hopefully JROTC will be expanded as well.

5 You are absolutely right about civics. The most recent б NAEP test on civics found that only 25 percent of our eighth-graders are proficient. There is a lot we can do. 7 As our chairman said, we did not expect -- civics was not on 8 9 our initial mandate, but everywhere we went across the 10 country people raised the same concern that you have raised, 11 which is that we have to restore civics in schools. So we 12 have recommended that there be a new civics fund created at 13 the Department of Education, \$200 million a year, both for 14 teacher training in civics and to bring civics programs back 15 in.

Just today, in a bipartisan way, Senator Cornyn and Senator Coons and Congresswoman DeLauro and Blumenauer and Cole are introducing the Secure American Democracy Through Civics Act. There is a new coalition, Educating for Democracy. Three hundred scholars put out a roadmap last week, and that legislation will put \$1 billion over five years.

We have also proposed that we restore service learning schools, so that kids can have the experience of doing community service in an educational context. Basically, we

agree with your concern, and this has to start in first
grade and go all the way through high school, so that young
people are exposed to what our country means, how the system
of government works, what their rights and responsibilities
are, but then also have the chance to do service themselves
as they are going through the education system.

Senator Ernst: Fantastic. And my time has expired, but I do appreciate the great service that you have given on this Commission. I think it is important that we all take a very hard look at it and look at your recommendations and how we might follow through. Thank you very much. Thank you, Mr. Chair.

13 Chairman Reed: Thank you, Senator Ernst. Let me14 recognize Senator Gillibrand via Webex.

15 Senator Gillibrand: Thank you, Mr. Chairman. Thank 16 you to the witnesses for this excellent presentation. I 17 think your report is ground-breaking, and I think the 18 greatest asset this nation has always had is its people. 19 And on the Armed Services Committee I have worked very hard 20 to make sure the kids that apply for the service academies 21 are more diverse than would naturally occur.

And so I want to hear your recommendations. You outlined in the report that you want to increase the number of candidates of color, you want to increase the number of even people with disabilities, people who have been

previously incarcerated, to expand national public service
 to everyone. And you want to not only expand who is
 applying but who actually is given the roles.

4 Can you speak a little bit too how you intend to do 5 this and how we can reach out to these communities more 6 effectively?

7 Ms. Wada: Well, the Commission, one of the ideas that 8 we have had is to do allow people to have scholarships that 9 they would be able to take into different communities to be 10 able to do that. We also want to increase the opportunities 11 for national service in communities of underserved 12 populations. To be able to do that, we have to increase the 13 stipends and also the positions available.

14 What the Commission found was there are a number of 15 barriers to service, and even including not just national 16 service barriers but also military service barriers. Education is one of them. In a number of underserved 17 18 communities it may not just be the fact that they have 19 physical or mental waiver requirements but it also sometimes 20 is the educational attainment that they are not able to 21 achieve, which becomes a barrier to military service in some 22 of these underserved communities.

23 Senator Gillibrand: A little more to the question that 24 Senator Blumenthal raised, to basically have an expansion of 25 the GI Bill so that people can do public service after high

school or college and commit to a certain amount of public
 service in exchange for having student debt paid down to a
 certain degree or to receive a public education.

4 Dr. Heck: Yes, Senator. We did propose that the Segal 5 award, that the AmeriCorps members receive, get increased б equal to one year of in-state tuition. When it was first 7 proposed, back in 1994 when it came into existence, it covered a year. It was raised to the level of Pell grants 8 in the Serve America Act of 2009, but it still is less than 9 10 a year. So we think if you could do a year of service and get a year of in-state tuition, you could serve your way 11 12 through higher education.

Ms. Wada: Senator, I would also add the Commission had 13 14 a recommendation where we recommended that the military 15 provide sort of training prior to entrance of military 16 service. So if you, say, wanted to get your truck driver 17 CDL license that you would be able to go to get your CDL 18 license prior to joining the military, and then have a 19 service commitment that way as well. It is a tangible sort 20 of achievement that an individual could have prior to making the commitment to serve. 21

22 Senator Gillibrand: Would you recommend for each year 23 you agree for service to have a year of education paid for? 24 So, for example, if you agreed to four years of service you 25 would get a four-year degree, if you agreed to two years of

1 service you would get a two-year degree? Is that the 2 investment we should make to try to encourage more 3 Americans, particularly those who are most underserved in 4 the underserved communities to look at service as a stepping 5 stone for their career?

6 Mr. Khazei: Yes, absolutely. In fact, our 7 recommendation is that the post-service Segal award should 8 be equivalent to one year of in-state tuition at a public 9 university. So you could do exactly what you said. If you 10 served for two years you get two years of education, or for 11 four you get four years. You could essentially serve your 12 way to higher education.

Senator Gillibrand: -- understand your views on 13 14 particularly this very unique population of those who have 15 been previously incarcerated. That is the group of people 16 that I have legislated on in terms of urban jobs 17 legislation, to try to get them job training. This would be 18 a very directed approach to try to get everyone to be fully 19 employed, who want to be employed, through this kind of 20 training and public service.

21 Mr. Khazei: Absolutely. In fact, we recommended there 22 are service programs like YouthBuild, Green City Force that 23 have brought young people who were formerly incarcerated, 24 very successful. And one of our recommendations is that the 25 Corporation of National Service should look at more

1 opportunities for people who have been formerly

2 incarcerated. It is a great transition to do national

3 service. We recommended that.

Senator Gillibrand: I would assume that it would be
wise to expand the definition of public service to include,
of course, the military, but also our intelligence services,
also all government service, health care, education, and
green jobs. Could you see this expanding that far, to all
public service?

Dr. Heck: Senator, for the purposes of the Commission we defined public service as employment in either state, local, tribal, or Federal Government positions, but many of the recommendations that we do make are able to be extrapolated to other forms of service as well.

15 Senator Gillibrand: Thank you, Mr. Chairman.

16 Chairman Reed: Thank you, Senator Gillibrand. Let me 17 recognize Senator Kaine.

Senator Kaine: Thank you, Mr. Chair and Ranking
Member. To the members of the Commission, congratulations.
I really look forward to digging into this.

21 National service is so important. When I was a kid in 22 law school I took a year off to help run a vocational school 23 in Honduras, and it was transformative. I was the oldest of 24 three boys. Because I had that experience and it was 25 transformative, my younger brother took a year off between

1 college and med school to work for a center for refugees in 2 Houston, and then my youngest brother took a year off 3 between college and law school to work at a homeless shelter 4 and ministry with the homeless in Richmond. These were all 5 informal, there was not a government program, there was no б incentives or benefits, but each of us found that to be transformative in our lives. Two of my three children have 7 done more formal public service. One is a member of the 8 9 United States Marine Corps and one with AmeriCorps.

10 So there are a lot of questions I want to ask, but let 11 me just ask this one. I think the current way we do public 12 service, or try to incentivize public service, is highly 13 confusing. Just to use the example of the various public 14 service loan forgiveness programs. Senator Gillibrand and I 15 have a bill called the What You Can Do For Your Country Act 16 that basically tries to streamline and pull together the 17 various different public service loan programs that we have. 18 I am a member of the Health, Education, Labor and Pensions 19 Committee and it is kind of in our jurisdiction there.

We have incentives for military service. I saw an Admiral Davidson on TV this morning that said sign up for the Navy, up to \$40,000 signing bonus. We have programs to encourage students in schools if they want to study cyber, either to work on the civilian side or the military side. We have a variety of other public service loan programs for

physicians or health workers if they work in underserved areas. But we also often face a situation where people are confused by the rules and they get into the wrong repayment program, and they think they are going to get their loan forgiven and then find out that that is not the case.

б The previous administration, at the Department of 7 Education, was very, very customer-unfriendly in trying to get people into the right programs so they could get their 8 loans forgiven. And they even stated a philosophical 9 objection to the programs. One of the key officials at the 10 11 DOE said, "Why would we want to give an incentive to work in 12 public service rather than an incentive to work in the 13 private sector?"

Do you have recommendations in here about the way we can take the variety of programs that Congress has done to provide incentives for people to go into different kinds of public service and (a) make them more streamlined, and (b) communicate them better so that students and their families, as they are thinking about their future, have this information at their hands as they make decisions?

Dr. Heck: Senator, thank you. Great question. We do have a series of recommendations through each one of the topic areas -- military, national, and public -- as well as cross-cutting recommendations on how do we tie them all together. Our recommendations revolve really around three

areas: awareness, aspiration, and access. You cannot be what you do not know. We have to make sure people are aware of the opportunities that are out there for them. Once they are aware, they need to aspire to want to participate, and then we have to make sure they have a program.

б We feel that one of the best ways to do that is to 7 create the online platform, kind of a national service clearinghouse online platform, where all forms of service 8 9 are there -- military, national, and public service -- that 10 outline what the responsibilities are, what the benefits 11 are. In this way, somebody does not need to go through a 12 series of websites to try to figure out what they want to do 13 and what might work best for them.

14 Certainly, many of the recommendations we concentrated 15 on to increase national service participation look at that 16 benefits package. My colleague mentioned one which was the 17 Segal award and pegging it to one year of in-state tuition as opposed to the Pell grant. Another is looking at the 18 19 living stipend, to make sure that the living stipend is 20 sufficient to allow that person to participate. Right now 21 there is very little wiggle room in setting that number, and 22 obviously it is a different cost of living in downtown New 23 York versus in a rural state.

24 So we have several recommendations to try to address 25 those areas, and to have this cross-cutting approach, to

1 make sure that regardless of what line of service an
2 individual is interested in that they will be supported in
3 that line of service.

Senator Kaine: I very much appreciate it, and Alan, in
particular, it is great to see you again. Thanks for your
great work for so many years in advancing the idea of public
service. I look forward to following up on your
recommendations and I appreciate it. Thank you, Mr. Chair.
Chairman Reed: Thank you, Senator Kaine. Let me now
call on Senator King via Webex.

11 Senator King: Senator, thank you very much. I am in 12 the hall of Dirksen between two meetings. Most of the 13 comments and questions have been already presented to the 14 committee this morning. The necessity -- necessity -- of greater civic education I do not think can be overestimated. 15 16 I think one of the great losses, and I do not really quite 17 understand why it has happened in the last 30 or 40 years, 18 has been the decline of civics, literally civics, in the 19 high school curriculum around the country.

A couple of other questions. Does the Commission have an estimate of the number of 18-year-olds in the country -if we are talking about 2 years, 18- and 19-year-olds, how many people are we talking about, for example?

Mr. Khazei: Senator, we completely agree with you on the issue of civics, and that is why we have recommended a

1 new civics fund at the Department of Education, \$200 million
2 a year, and are excited about the new legislation that is
3 being introduced today in a bipartisan fashion.

4 You know, right now the Federal Government spends about 5 \$5 million a year on civics, and spends over \$3 billion on б STEM. And when the government committed to investing in 7 STEM, STEM accelerated all across the country. We think the same commitment should be made in civics. And we heard it 8 9 everywhere we went, people raised the same concern you did. 10 There are roughly four million young people that turn 11 18 every single year, so in terms of 18- and 19-year-olds, 12 there would be about eight million.

Senator King: So that is not a gigantic number in terms of providing some kind of national service option.

15 Now another question is, is this a question of 16 communication, where people do not know the availability of 17 these slots, or are there not enough slots? In other words, 18 do we need more slots in AmeriCorps or the military or the 19 other places where national service might take place, or is 20 it just a question of there are fewer people applying and 21 therefore if we advertised more and made people aware of 22 these options we would have more participation? Which is 23 it, communications or shortage of slots?

Mr. Khazei: It is a little of both. There is definitely a shortage of shots. You know, AmeriCorps is

1 roughly 75,000 people a year, Peace Corps is about 7,000, 2 and YouthBuild about 8,000. So there is less than 100,000 3 slots for that cohort, as you mentioned, four million, eight 4 million people, and there is way more demand. There are 5 programs all across the country that have way more people б applying. The corporation gets requests for funding that 7 far exceeds that grant authority. And we recommended that there should be enough funding to get to one million people 8 a year over 10 years. 9

10 But there is also a question of when. As we traveled 11 the country, we found that very few people known about 12 AmeriCorps and the opportunity to serve. So we think there 13 needs to be both, and including people who have misgivings 14 or misunderstandings about the military, as my fellow 15 Commissioner Wada mentioned. So we did think there should 16 be a new call to service that would link all three streams 17 of service, as well as increased support, especially on the 18 civilian service side.

19 Senator King: I have to say I was --

20 Mr. Khazei: And thank you for your leadership on the 21 CORE Act, which would do that.

Senator King: Well, that is exactly what we are hopingwill happen.

I have to say, I was somewhat amused by the new idea of service in exchange for a year of college scholarship. My

1 mother did that in the '20s. She had a scholarship to 2 William and Mary in Virginia, and for every year of her 3 scholarship she was committed to teach for a year, in the 4 commonwealth of Virginia. So this is back to the future. 5 And I think that might make a huge difference, either on the б front end or the back end. You can do the service before 7 you go to school and earn credits towards your school, or financial support towards your schooling, or at the end of 8 9 your schooling you can do a service job and have a year of 10 your costs forgiven. So I think it makes sense. It worked 11 100 years ago and I suspect it may work.

12 Thank you so much for the work of this Commission. I 13 think it is timely and important, and I think you are going 14 to find a receptive audience here in the Capitol, just as 15 you already have today. So thank you for the great work on 16 the Commission.

17 Thank you, Mr. Chairman.

18 Chairman Reed: Thank you, Senator King. And let me 19 now recognize Senator Blackburn via Webex.

20 Senator Blackburn: Thank you so much. I appreciate 21 that and I appreciate that you all are with us.

I think that, you know, that we are all really aware of the changing nature of warfare and the fighting that is going to take place in the domains of space and cyber. In the Commission's final report you recommend developing new

voluntary models for assessing personnel with critical
 skills. And how do your findings support the military
 framework like a national reserve digital corps, which
 leverages the STEM workforce and national service?

5 Dr. Heck: Thank you, Senator Blackburn. One of our 6 recommendations is the formation of a civilian cybersecurity 7 kind of reserve force that is made up of individuals who 8 have previously served in the U.S. Government as 9 cybersecurity experts, have left Federal Government but are 10 willing to participate for surge capacity in the event of a 11 national emergency.

So we see that, coupled with the specific critical skills, individual ready reserve, which is an opportunity for individuals without any prior military experience, to be able to volunteer their critical skill set in times of a national emergency, and both of those are listed and fleshed out in our recommendations.

Senator Blackburn: Yeah. What about building this out through the National Guard or through the ROTC or Junior ROTC programs?

21 Dr. Heck: Well, we do look at Junior ROTC and the 22 expansion thereof as another pathway to introduce 23 individuals to potential service in the military. We also 24 talk about expanding the utilization of the Armed Services 25 Vocational Aptitude Battery Career Exploration Program,

ASVAB/CEPT, which right now only about 15 percent of high 1 2 school students participate in. And that is not just about 3 getting them in a pathway to the service but helping them 4 determine where their skill set is for what they might want 5 to do as a career or as a trade, regardless of whether or not they enter into the military. But JROTC is really a б 7 citizenship program more than a military program. Within senior ROTC at college levels there are the opportunities 8 9 for individuals to engage in specific high-STEM level and 10 cybersecurity programs. Those should be expanded.

11 And the key, we believe, is having more individuals 12 that are not already in the military pipeline being exposed 13 to and interested in providing service in this field. 14 Hence, the critical skills IRR and the cybersecurity reserve 15 program.

Senator Blackburn: Well, I tell you, I think the DOD 16 17 studies that show only 29 percent of today's youth is 18 eligible or interested in military service that is something 19 that should be of tremendous concern for us. And when you 20 talk about citizenships programs, yes, they are important 21 because that is how people are going to develop that desire, 22 whether it is scouting programs or Junior ROTC, or some of 23 those that build that awareness. I think also using the 24 National Guard so that individuals who are working in some 25 of the cyber and digital fields have the ability to bring

their skills to the military service, and with it bring that innovation. I really think that is a very important component.

And this means that the National Guard, the Reserve, and our active-duty military, everyone needs to change some of their recruiting practices. Don't you think?

7 Dr. Heck: Most definitely, ma'am. We have an entire section dedicated to how the military needs to adapt its 8 9 recruiting methods to reach the potential recruits where 10 they live and where they are, especially with expanding 11 hometown recruiting programs, multiyear budgeting for the 12 advertising budgets so they can plan out an advertising 13 blitz, making sure that they are getting to individuals on 14 the social media platforms that they are on. And if you are 15 still advertising on TV to a millennial, you are not 16 advertising to that millennial.

Senator Blackburn: Right. Absolutely. Thank you somuch. I yield back, Mr. Chairman.

19 Chairman Reed: Thank you very much, Senator, and let 20 me recognize Senator Kelly, please.

21 Senator Kelly: Thank you, Mr. Chairman, and Dr. Heck 22 and Ms. Wada and Mr. Khazei, thank you to all of you for 23 working on this Commission. I come from a family of public 24 servants. Both my parents were police officers. When I was 25 18 years old, I went to the U.S. Merchant Marine Academy. I

1 spent 25 years in the Navy and at NASA. Now I am here in 2 the Senate, continuing public service, because I feel there 3 is no better way you can spend your time than trying to 4 improve our nation, and fight for what is right and help our 5 neighbors, whether that is in the military or in the б government or in some other form of service. Engaging 7 Americans in some form of national service is an important way of addressing divisions in our country and emerging from 8 9 our current crisis stronger and more united.

10 Certain moments in our country's history have 11 galvanized generations and called them to serve. I think 12 9/11 is an example of this. There have been others. And 13 that is sometimes military service. It is sometimes other 14 forms of Federal service. You know, then there are other 15 events, events like the SolarWinds hack, which reminds us 16 how important certain critical skill areas will continue to 17 be for our government. It also calls to mind scenarios that 18 could require us to surge external support on a short 19 notice.

I understand the Commission considered a range of ways to identify individuals with critical skills. Can you speak to your findings on the different approaches there, and then I have a follow-up question. Dr. Heck?

Dr. Heck: Thank you, Senator. Yeah, so we explored various ways to try to encourage those with critical skills

1 to become involved and how we could identify those 2 individuals, starting with actually looking at like a 3 critical skills draft, if it was necessary. There is a 4 health care professional delivery system model that is a 5 subset of the currently existing Selective Service System, б where they would draft health care professionals in times of 7 war. So that model could be expanded to other skill sets if we were at a point where we were in conflict and needed to 8 9 go to conscription.

10 However, as you well know, there are many conflicts 11 that will be short of conscription where we still may need 12 to tap into this expertise. And so that, again, goes back 13 to the concept of a critical skills individual ready 14 reserve, where individuals with no military experience have 15 the opportunity to sign up and participate in an individual 16 capacity in the times of need. Some training, you know, 17 once a year, perhaps a stipend to be engaged, and then be 18 called on when needed. We specifically focused on the 19 cybersecurity reserve force, which takes individuals that 20 have already worked in the government in that field, and 21 have received some of the best training and have already got 22 the clearances, but have left the government service to be 23 able to be a reserve force to call back in, to serve in 24 times of need.

25

Those types of programs can be extrapolated across any

1 critical skill. In fact, one of our charges was to identify 2 potential critical skills. What we realized when we start 3 is that it is impossible to predict the future, and what is 4 a critical skill today may not be a critical skill 10 years 5 from now. And so we did not specifically lay out which б skills need to be addressed, but identified models that 7 would work, depending upon what the policymakers believed 8 the critical skills were for a given point in time.

9 Senator Kelly: So in the cyber field you look at 10 individuals that already served in government that had 11 specific skills that had clearance. Was there any thought 12 given to try to attract to that same community possibly 13 younger people that never served in government but often do 14 have a certain set of skills that they acquired on their 15 own, and could also be part of a larger effort when we need 16 some sort of surge capability in the cyber arena?

17 Dr. Heck: Yes, sir. That is the concept behind our 18 critical skills individual ready reserve, which is not 19 limited to any critical skill. And that would be for, in 20 this case, in your example, additional cyber experts that 21 possessed that critical capability to sign up in an 22 individual ready reserve process that is not military 23 related. It is no military service. It is an opportunity to serve in that capacity when needed. 24

25

1 enough interest to make a program like that worthwhile?

2 Dr. Heck: Hard to predict what the interest would be, 3 but we did find, as we traveled around the nation and talked 4 with people of all walks of life, that there are many people 5 interested in providing service in their state, local, and б federal government communities, short of wanting to put on a 7 uniform. And especially when you talk to folks who want to be able to serve but serve where they live, you know, and I 8 think that is where the opportunity for a program like this 9 10 would show benefit.

11 Senator Kelly: Thank you, Dr. Heck.

12 Chairman Reed: Thank you, Senator Kelly. Let me13 recognize Senator Sullivan.

14 Senator Sullivan: Thank you, Mr. Chairman, and 15 General, good to see you again sir. Congratulations to you 16 and the whole committee for doing this. You and I have been 17 in touch on your work for some time now. I am really glad 18 to see the hard work paid off here, and I am glad to see the 19 committee is holding a hearing on this.

I wanted to ask kind of a question that is not really related but it came up last week in our confirmation hearing for the Under Secretary of Policy. We were talking about an issue, and, you know, I think you know, from your own service, that the military is not a perfect institution but I think in America it is certainly well respected. And I

think most people see it as one of the most important, in many ways, civil rights institutions, given how it is integrated, different ethnic groups throughout our country. You know, in the Marine Corps nobody cares what race you are in. They just care how good of a Marine you are. That is the ethic that we all want throughout our nation. I think it goes the idea of common service too.

8 We had an Under Secretary nominee up for his position, 9 Under Secretary of Policy, who declared that there was, 10 quote, "systemic racism within the ranks of the military." 11 That was his quote. I questioned him on it, and I said, 12 "That is a pretty broad statement here to be making. Do you 13 have any data to back that up?" He did not.

14 So I am just wondering, first, very quickly, and maybe 15 you can just say yes or no, in all your meetings with the 16 military and communities and people who have served and 17 others, did you see any actual data that there is systemic 18 racism within the ranks of the military?

Dr. Heck: Senator, thank you for the question. As we traveled the nation and talked with officers and enlisted, as well as the general public, you know, the one thing that resonated was the fact that people want an opportunity to serve, especially in the military. And when you look at bringing people together, as we do in military training, they leave that training looking at each other, to their

left and right, and calling each other "brother" and "sister." When you bring people together in a civilian job training program they leave calling each other "colleague." And I think that speaks volumes to what bringing people together in a common cause like service can accomplish.

6 Senator Sullivan: Yeah, that has been my experience as 7 well. Again, not a perfect organization by any means, but 8 to make that statement here without any data to me was kind 9 of shocking.

10 Let me turn to actually your report. You know, this 11 idea of critical skills lists in the IRR, I have been 12 working on legislation that relates to that with regard to 13 public health, particularly as it relates to what we have 14 just been going through, a pandemic where, you know, God 15 forbid we have another one, but we probably are at some 16 point in our history, and to be able to surge young men and 17 women who have critical skills, for example, in health care. 18 You are a general in the Army. You are the chairman of this 19 Commission. You also know a lot about health care. I 20 wonder what you think about that idea.

21 And then I was surprised to see that in a number of 22 your critical skills list ideas, as I am looking through the 23 report, the Pentagon is opposing the recommendations that 24 you are putting forward. Could you talk about that idea of 25 like a surge IRR capacity, if we had another big pandemic,

young men and women who have training in health care can be recalled, public health service, military combination, and why that could be important, but also why do you think the Pentagon opposes those kind of ideas?

5 Dr. Heck: Senator, first, I wholly support the concept 6 of health care professionals being included within the 7 critical skills requirement, and certainly the programs that we recommend could include health care professionals to 8 9 surge. I think the important point that we try to make in 10 the critical skills IRR, and perhaps IRR was not an artful 11 term to use, and it may cause some angst or confusion. But 12 we look at it as an opportunity for those with no prior 13 military experience. As you know, the current IRR is those 14 military members that are waiting to complete their military 15 obligation with really no requirement to perform any 16 service, but are still subject to recall. I believe that is 17 one of the issues that DOD has, and maybe more with the name 18 than it is with the program, also to ensure that it does not 19 count against their end-strength caps, which they are 20 already constrained by.

21 Senator Sullivan: Great. Thank you. Thank you, Mr.22 Chairman.

23 Chairman Reed: Thank you very much, Senator Sullivan. 24 We do not anticipate a second round, but I have a question 25 and then I will yield to the ranking member for his

question. If others join us in the interim then they will
 be recognized.

3 Again, you have done a superb job. One of the issues 4 that you raised was the less-than-representative composition 5 of the military today, through recruiting efforts, et cetera, and that cuts both geographically and other б 7 categories, race and gender, perhaps. Can you give us an idea, Dr. Heck, General Heck -- I will use both -- of what 8 are the factors that are driving it. Is it an inattention 9 10 to areas or groups? Is it just we have always done it that way? Go ahead, please. 11

12 Dr. Heck: Sir, again, a great question. So there are 13 several factors that weigh into this issue. One, which was previously discussed briefly, is the growing civil-military 14 15 divide where individuals just do not think about wanting to 16 serve in uniform. We know that roughly 60 percent of 17 recruits today come from a small band of states through the 18 South and the West. We know that military service is 19 becoming a family business. I served because my mother 20 served, my father served.

21 And part of this is the growing disconnect. The other 22 thing that Ms. Wada had mentioned earlier is how are the 23 services getting their message out to the population. All 24 services are doing a much better job now, but previously the 25 advertisements all were the high-speed, you know, low-drag

1 MOS's, rappelling out of helicopters, kicking in doors, 2 which is not where the large majority of today's population 3 is. But when you start advertising the opportunity to be a 4 physician, to be a nurse, to be a cyber professional, to be 5 a cook, to be a truck driver, we need to concentrate more on б the positions that are not combat related. As you know, 7 less than one-third of the positions in the Army, even less across the services, are considered ground combat positions, 8 yet that seems to be what we advertise for. 9

10 Another piece, I believe, is the actual way we provide 11 the opportunity for males to register with the Selective 12 Service. It is a passive process. So they go in to get 13 their driver's license and a box is checked and they are 14 registered with the Selective Service, not realizing the 15 solemn obligation that they just undertook and the gravity 16 of the situation which may call upon them to potentially 17 risk their lives in service to this nation. All part of the 18 growing civ-mil divide, and that is where we need to tackle 19 this issue.

20 Chairman Reed: Well, thank you very much, Dr. Heck.21 Senator, are you ready?

22 Senator Inhofe: Oh yeah. I will make this real quick. 23 We have one more presenter here. But do not misinterpret 24 what I said about my having been a product of the draft. I 25 have to admit that I disagree with you on that, and yet I am

realistic enough to know that since I am the only member of this committee who believes in compulsory service, it ain't going to happen. But I would just say it happened in a great, beneficial way to me and my life. Okay?

5 Chairman Reed: Well, thank you, Mr. Chairman, and you 6 and I might be the only persons here that actually were 7 subject to signing up for the draft.

8 Senator Hawley, please.

9 Senator Hawley: Thank you, Mr. Chairman, and thank you
10 to the witnesses for being here.

11 Dr. Heck, let me start with you. Missouri, as you 12 know, is the proud home of Fort Leonard Wood and Whiteman 13 Air Force Base and a number of other military installations 14 of which we are very proud. And so in my state there is a 15 strong-felt connection between local communities all across 16 the state and the United States military, and between the 17 ethic and the tradition of service and local communities. 18 But that is, to your point just a second ago, that is not 19 the case in many parts of the country.

So give us a sense of what you think the most important steps are that we can take, think about taking to reconnect those communities, geographic areas of the country that increasingly have no regular contact with, no felt sense of camaraderie with the military way of life. What can we do to reconnect those things? And also as part of that, to

build a sort of shared national sense of identity, which I
 think is an important part of this.

3 Dr. Heck: Thank you, Senator, for the question. I 4 will take it two different kind of pathways. First is how 5 the Department of Defense actually goes about recruiting, б and although they are making inroads and putting more 7 resources into kind of northeastern and midwestern urban areas, which are historically areas that are difficult to 8 recruit from, that is the first step. The other piece that 9 10 we think is critically important is the expansion of a 11 program called Hometown Recruiting. If you want to get 12 somebody from a specific high school, a specific town to 13 sign up, the best way to do that is to send a graduate of 14 that high school to go talk to that class. Right now, 15 Hometown Recruiting is done via permissive TDY. So you are 16 home on vacation or on leave, you can do it. You get no 17 benefit from doing it. It is just doing it out of service. 18 We believe that should be funded, that you should send that 19 person home on a true TDY tour, and pay them their travel 20 and their per diem while they are home on leave, to be able 21 to do that.

The other piece goes to the bigger issue that we face with the civ-military divide writ large. And while you have an excellent situation in Missouri, as you mentioned, it is not the same way. Part of it is, you know, post-9/11 we

1 closed down our bases from a security standpoint, which 2 makes it harder for the general population to get on base 3 and interact with members in the military. Also from a 4 security perspective, the military has become more insular. 5 So we are shopping on base, we go to church on base, we golf б on base. We are not getting out into the community as much 7 as we should, just in normal, everyday life, and that also contributes to the growing disconnect. 8

9 So we need to address those issues that tend to 10 continue to grow the civ-mil divide, and we need to target 11 our recruiting resources in a much more focused way on how 12 we can recruit, attract, and retain those individuals.

Senator Hawley: Very good. Thank you for that. Ms.
Wada, do you want to add anything to that?

15 Ms. Wada: No. I would also say that we need to ensure 16 that when we are recruiting we are using the latest 17 advertising platforms, right. One of the recommendations we 18 made was to give them a multiyear recruiting budget, so that 19 when they do buy their spend at the beginning of the year 20 they are able to more effectively buy ads, particularly when we talk about social media platforms, and how you best 21 22 engage with the younger generation, the Gen Z's, actually, 23 at this point, that we are looking for.

24 Senator Hawley: Yeah. Very good. Thank you. Let me 25 ask you, Ms. Wada, I will start with you on this. General

1 Milley recently said that -- he has said this a lot, 2 actually -- that the character of warfare is changing, and 3 he spoke in particular about the role of the advanced 4 technologies on the battlefield, that is speeding and 5 changing the pace of warfare, and is changing the way that б we fight, all across the board, in every sense. How should the Selective Service System, in your view, change to 7 reflect these changes in the way that our military, and 8 9 other militaries across the world, are now fighting? 10 Ms. Wada: So the Commission did not make any 11 recommendations on how we change who we register except for 12 the expansion of women. The individual requirements that 13 the Department or the services will need in the future will

14 be determined at that point in time, when we are facing that 15 existential threat.

And so what we said was to ensure that we have the most qualified individual in this country, able to be chosen for or participate in a draft that we expand Selective Service to women, and that way we would have the best-qualified individuals available to be potentially available for a draft.

22 Senator Hawley: Very good. Dr. Heck, do you have 23 anything to add on that point?

Let me ask you this. I have got just a few seconds remaining. For any of you, the Commission's report

1 mentions, and you just mentioned this, Dr. Heck, a moment 2 ago, to the chairman, that unless there is a family member 3 or a close friend who has served, most Americans simply are 4 not aware of the various service opportunities. I am sure 5 they are aware of the United States military but they are б not aware of what that would actually mean, tangibly. How did we get to this point, do you think? I mean, how have we 7 reached this point, and what are the most common reactions 8 9 you received or heard about when talking to young people 10 about the U.S. military?

11 Ms. Wada, go ahead.

12 Ms. Wada: I like to tell the story about the young 13 kids that we met with here in Washington that came from 14 Wisconsin. And I asked them, "How many of you were 15 interested in serving in the military?" and maybe in the 16 group of ten, three hand went up. And so I asked them, "Why 17 did you choose not to join the military, or not consider 18 joining the military?" The first response, from the 19 majority of kids in the room was, "My parents would kill me, 20 because they expect me to go to college."

And then I said, "Well, how are you going to pay for college? Is your college paid for?" Ninety percent of the room, "No, it is not paid for. I don't know how I will go to college." And I said, "Well, do you know that the military provides college opportunities? You can go through

ROTC if you went to a college. You can get a ROTC
 scholarship. You can go and serve for four years as an
 enlisted, get college paid for." They had no idea.

But what struck me was one young gentleman said, "I really wanted to join the military but I wanted to go into finance," and I said, "Do you know that there are finance opportunities in the military?" I said, "My brother was a finance officer in the United States Marine Corps." And this look of shock that that is even a possibility had never occurred to most of the people in that room.

11 And what we found when we went across the country is 12 that is actually the norm. That is not an anomaly. And so 13 we need to do a better job in educating and providing 14 opportunities for young Americans when they are at that 15 point in time, and we have been told that is at middle 16 school, to be able to have those conversations of if you 17 want to be X, this is all the pathways to get there. And 18 that is why we recommend a sort of a one-stop shop through a 19 website that would allow people to do that.

Senator Hawley: Very good. Thank you, Mr. Chairman.
 Chairman Reed: Thank you, Senator Hawley. Now me
 recognize Senator Duckworth via Webex.

Senator Duckworth: Thank you, Mr. Chairman. I also
want to thank the Commission for their work and their
recommendations today. In particular, I want to highlight

1 one quote from the report that stands out to me, because it 2 describes why national service is a fundamentally American 3 idea. And I quote, "Americans who repeatedly step up in 4 support of each other, offering their sweat and ingenuity 5 when needed, without being asked and without expectation of б anything in return, " end quote. I think that speaks volumes 7 as to the ways military families serve alongside their servicemembers, and often go above and beyond what military 8 9 families are asked to do. And yet spouses and other family 10 members face hurdles to education, unemployment, and can 11 find themselves isolated from their extended family and 12 support network.

13 Dr. Heck, I understand that for your work with the 14 Commission you engaged with military families to get a 15 better perspective on how they view or participate in 16 service to their communities. Can you speak to the 17 potential impact of a program that would provide service 18 opportunities specifically to military family members, 19 giving them the opportunity to serve in their communities 20 and gain skills and accreditations, or even for progress 21 towards educational opportunities or even some grant 22 funding, sort of an AmeriCorps kind of an idea but for 23 military families?

Dr. Heck: Thank you for the question, Senator
Duckworth. Certainly the Commission looks at elevating all

forms of service with an eye towards growing national service opportunities across the board. And so if there was to be a segment of that growth targeted towards military families that would still achieve the goal that the Commission has of having one million people in national service annually by 2031.

7 Certainly for the points that you mentioned, military families sacrifice and serve just as much, sometimes, if not 8 9 more, than the individual wearing the uniform. And they 10 suffer when they move, constant PCS moves, base to base, 11 inability to maintain employment, get a good education. And 12 so providing them national service opportunities also goes 13 to the ability for them to serve in their local community or 14 on their post, camp, or station, to care for their brothers 15 and sisters in arms.

16 That was something that we heard as we traveled around 17 the country and spoke to individuals about service. There 18 are a lot of people who want to serve, but they may not want 19 to, you know, Peace Corps outside the country. They may not 20 want to do AmeriCorps in an underserved community in a 21 different state. They want to serve where they live, and 22 take care of their neighbors, and this is a great example of 23 how we could grow service, open up opportunities, and allow 24 people to serve where they live.

25

Senator Duckworth: Thank you. Mr. Wada, from your

perspective, with the Commission and your previous experience working in DOD, what are some potential barriers to implementing a service corps designed for military families, and are there any other ways you can think of for the Department to make service opportunities accessible to military spouses and families?

7 Ms. Wada: Thank you, Senator, for the question. I think that providing opportunities and to family members and 8 9 spouses that would develop the skills necessary for them to 10 be able to transition from base to base is important, and 11 leveraging national service to be able to do would be of 12 benefit. I think the Department would have to do an 13 analysis, though, on how best to engage in such a program, 14 to ensure that they are meeting not just the potential 15 requirements that may be highlighted or identified by the 16 Department and the services, but also in the local 17 communities in which they serve, so that there is a balance. 18 Senator Duckworth: Thank you. Mr. Khazei, there are a 19 number of programs throughout DOD that support employment, 20 but the momentum and motivation to take advantage of these 21 programs can really vary from installation to installation. 22 Obviously, the installation commander can make it easy or 23 difficult. Do you see the establishment of a military

24 family service corps as something that can help support

25 these effort in alignment with the overall national public

1 service program's intent?

2 Mr. Khazei: Senator Duckworth, yes, I think your proposal is a brilliant idea, and there is precedent. 3 4 FEMACorps, which is a partnership between AmeriCorps and 5 FEMA, leveraging FEMA resources and the AmeriCorps б experience in developing a service program, has been 7 extremely successful in a number of areas. And I think 8 that, you know, military spouse unemployment, as you know, 9 is 24 percent. When Blue Star Families did a study last 10 year, they found that the number one concern of military 11 spouses is employment opportunities. This kind of program, 12 I think, could be developed as an AmeriCorps program for military families, and we found that AmeriCorps is a great 13 14 transition to employment. People learn skills. People who 15 volunteer are 27 percent more likely to be employed after, and in rural it is 55 percent. There is tons of work on 16 17 installations, whether it is working military schools, 18 supporting wounded warriors, supporting families 19 transitioning, coming up with high-quality other activities. 20 So I could it could be a standalone program. It could 21 be developed in partnership between the Corporation for 22 National Service and the Defense Department. And I think 23 there would be tremendous interest. As you know, there is a 24 strong spirit of volunteerism across our military families 25 and on installations.

Alderson® A Trustpoint Company

www.ald

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) Senator Duckworth. Thank you so much. This has been
 such an interesting hearing, and I appreciate each and every
 one of you for participating. And, Mr. Chairman, thank you
 for having a hearing on this topic. I yield back.

5 Chairman Reed: Thank you, Senator Duckworth. Senator
6 Tuberville, please.

7 Senator Tuberville: Thank you, Mr. Chairman. I want to thank all of you for being here today. You know, as a 8 9 former educator and coach, I believe in what we talked about 10 a little bit earlier, about civic education. It is amazing, 11 me traveling across the country to our schools, and doing a 12 lot of what you are talking about, recruiting, that is all I 13 did. They call you coaches but you are a recruiter, trying 14 to get the best to come play for you, to keep your job. 15 Sometimes works; sometimes it didn't. But it is amazing to 16 me, around a lot of these kids that are immigrants who know 17 more about our country than our natural-born citizens. And 18 I know in Alabama the last few years we now teach, required 19 teaching civics in the school. Auburn University, where I 20 coached for a long time and where I live now, to get into 21 Auburn you have to have had civics in school. We are not 22 teaching our basic fundamentals.

That being said, it is hard. Recruiting is hard. Getting kids nowadays, in this environment of technology, finding kids that want to work, to be honest with you. I

1 would recruit 25 kids a year -- 25. I would give them 2 \$100,000 to \$150,000 scholarship. Maybe 50 percent of them 3 made it for four years. They could not handle the strain, 4 the hard work, the dedication, the teamwork, the 5 responsibilities. It is amazing in this country how many of б these kids have never seen the sun come up. They do not 7 understand it unless they have been out all night. You know, my guys got up at 5 every morning, and we went to 8 9 work.

10 So we have got our hands full. If we want to do 11 something like this to where we obviously -- we want a 12 volunteer army. We want volunteer people to fight for this 13 country. But also, we are in a situation now where we are 14 going to have to have people trained.

15 I was glad to hear you say about education. Selling 16 people on coming here, you can get an education. You can 17 get an education doing this. So I think a big thing we have 18 got to do is obviously marketing. Marketing is a huge part 19 of it. And you see a lot. I have been on all these 20 campuses and high schools and you see all these recruiters 21 and people selling those things. I think it is going to 22 have to be even more. But we are in a tough world now. We 23 are recruiting people that are hard-nosed. We are not as 24 tough as we used to be. People used to have to fight to eat. Now my kids are the same way, 25 and 26 years old. 25

Alderson.

They are kids that they do not really understand, you know,
 getting their hands dirty sometimes, and getting knocked
 down, and getting back up.

4 So that being said, you know, with all the things that 5 you have to have, requirements, Dr. Heck, about getting a б kid into school, or getting them into military, you have got 7 to have an IQ above 85, cannot have a criminal record. We have got so many kids now that are obese. How many kids do 8 9 you think from 18 to 24, through your studies, 18 to 24, do 10 you think, in this country can make it in the military? 11 Dr. Heck: Senator Tuberville, it is a great question, 12 and I will just run real quickly through the numbers for 13 perspective. So every year there are about 32 million 17-14 to 24-year-olds in the nation, the prime recruiting target. 15 If you take out those that are unqualified due physical, 16 medical, behavioral, or legal problems, you are down to 9 17 million. If you look at those that 9 million who are 18 considered highly academically gualified, which is the 19 equivalent of being an A-B student or a score of 50 on the 20 Armed Forces Qualification Test, you are down to 4.5 21 million. From that group, if you look at those who meet 22 those first two criteria and are interested or propensed in 23 serving in the military, you are down to 450,000. So from a 24 population of 32 million we are going after a recruit pool 25 of 450,000, which every D1 school is also going after, which

Alderson®

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) 1 makes it very difficult.

Senator Tuberville: Thank you. Have you got any comments on that?

4 Ms. Wada: The marketing and recruiting is a very challenging program for all the services, especially in this 5 б environment. And where, historically, I think, there was a 7 belief that as the economy gets worse, recruiting will get better. I do not think the services are necessarily seeing 8 that correlation at this point because understanding that 9 10 most of divide has grown. So young adults today do not 11 understand military service and the opportunities that it 12 provides, and are not exposed to it because of the military 13 being much more close because of security reasons. And so 14 there are a number of different factors, I think, going on 15 today that have an adverse impact on a service's ability to 16 actually continue to recruit, from across the country. They 17 continue to do it well in certain areas of the country.

18 Senator Tuberville: I think the military is a great 19 point in terms of continuing education. Fifty percent of 20 the kids that go to 4-year schools nowadays do not need to 21 go. They need to go to the military or they need to go to 22 2-eyar schools to get educated to continue a life and raise 23 a family like they want to. I mean, bottom line. And 24 continuing education means that a majority -- I am not going 25 to say a majority -- a huge part of our country, when I took

Alderson Trustpoint Company

them into school, when I brought them to a 4-year school, could not read over the sixth-grade reading level. That is where we are at in our education this country. That is the reason we need military. That is the reason we need more education in the military, to continue to advance these kids, and I appreciate the work that you all have done. Thank you.

8 Thank you, Mr. Chairman.

9 Chairman Reed: Thank you, Senator Tuberville. Senator
10 Peters, please.

11 Senator Peters: Thank you, Mr. Chairman, and thank you 12 to our witnesses here today, and thank you for the work that 13 you have done on this report.

14 I want to focus a little bit on the civics education 15 piece that you address here, and how important that is and 16 how we have to strengthen it. We know a lot of school 17 districts are dropping civics education as well and folks 18 are not getting exposed to that. And we all know that a 19 strong democracy requires an informed, educated electorate 20 who understands how government works, what the opportunities are, what the limitations are, and how the active 21 22 involvement of a citizen requires more than just voting. 23 Voting is incredibly important, but it involves a whole lot 24 more than that.

25

My sense is, with civics classes, that it does not

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) 1 connect in ways that we would like that to connect to the 2 high school, and if it is a required course it like a 3 required course that they have to punch a ticket and get out 4 of there as quickly as they can.

5 So in your research, as you have looked at all of this, 6 are there some programs that really jumped out as very 7 effective to do it, more hands-on, especially with the fact that today's students need more of that kind of interaction. 8 9 They are not going to just sit through a lecture. They want 10 to be engaged. And also where they may have more exposure 11 to actual elected officials, for example, at all levels, and understand that it involves city council races as well, and 12 13 what happens on their neighborhood street. It is not just 14 what happens in Congress.

15 Are there some examples of what you, as you looked, is 16 there an example that really stood out, or two examples? 17 Dr. Heck: Sure, and thank you, Senator, for the 18 question, and we could not agree more. As we said in the 19 beginning, civic education was not one of our charges to 20 evaluate, but it was brought to us by the general population 21 with whom we spoke as we traveled the nation. And you are 22 right, you know, the Federal Government spends \$54 per 23 student on STEM and 5 cents per student on civic education. 24 And we believe that civic education is the foundation upon 25 which a lifetime of service will be built.

1 So to answer your question, I will give you a specific example. The Sandra Day O'Connor Act, which was adopted in 2 3 Florida, is an incredible example, because you are exactly 4 right. We do not want sitting through one semester of U.S. 5 government to count as civic education. It needs to be woven through every course, whether it is math, science, б 7 history, or English, so that students are constantly being exposed to lessons in civic education, of what it means to 8 9 be an America. And so that is one example that I was most 10 enamored by.

11 Senator Peters: Well, I want to pick up on that point, 12 because I think it is critically important that it cross 13 across all those areas. But I think it is also important 14 that it starts really early in life. If you are talking to 15 someone in high school, you are getting a late start in 16 getting that, because it has to be part of their culture.

17 From my own personal experience, I am proud Eagle 18 Scout, and proud through the scouting program. I started 19 very early in life, that kind of instilled those values and 20 understand how you put country above self and the greater good. To what extent did you look at some of those programs 21 22 that start in elementary school or early middle school? 23 Dr. Heck: Yes, sir. So we proposed that the civic 24 education, the classroom piece of it, begins in 25 kindergarten, but we also heavily support the reinvigoration

of service learning, where they are now going to take the theory that they have learned in the classroom and actually apply it. And we talk about the opportunities, perhaps do a specific, finite, concrete service project as a middle school student, looking at doing a semester of service while you are in high school, or a summer of service. Doing a service project between your high school and college years.

8 We could not agree more that the place to start 9 exposing our youth to civic education, service learning, and 10 a lifetime of service occurs at the earliest of ages, 11 because once you provide them with a meaningful service 12 opportunity that shows that they are much more likely to 13 continue serving throughout their lifetime.

14 In fact, just as a quick point, one of our first public 15 engagement was in Harrisburg, Pennsylvania, where we met 16 with a SeniorCorps group. And so I asked, "What was it that 17 you did in your prior life that now you are a retiree but 18 you still want to give back, and you are mentoring at-risk 19 youth, or you are sitting with homebound seniors?" Almost 20 universally, the females were teachers or nurses, the males 21 were police officers or prior service, military service, showing that once you get hooked -- again, being a 22 23 physician, I believe everybody has a service gene. Our goal 24 is to unlock it, and activate that gene so that people want 25 to participate throughout their lifetimes.

Alderson®

www.trustpoint.one www.aldersonreporting.com 800.FOR.DEPO (800.367.3376) Senator Peters: Great. Well, thank you for that, and
 I appreciate that answer. We definitely have to focus on
 getting to folks very young and making it just part of who
 they are as a person. Thank you.

5 Chairman Reed: Thank you, Senator Peters. Now let me
6 recognize Senator Rosen via Webex.

7 Senator Rosen: Thank you, Mr. Chairman, and I am going to thank the commissioners who are here with us this 8 9 morning. I especially want to thank Congressman Doctor Joe 10 Heck, who had the seat before me in Nevada's Third District. 11 His son, Joey, and my daughter went to school together in 12 Henderson, in junior high and high school, and I am just glad to see you here. I am really proud of the work that 13 14 you are doing.

15 And so to all the witnesses, I really commend your 16 creative thinking in finding ways to incentivize all 17 Americans. And when we think about the military, national, 18 and public service in the 21st century, we really have to 19 reimagine what civic engagement looks like. We have to 20 shape serving your country. Like you said, there are so 21 many ways to serve, and I would argue that the person giving 22 the service gets as much, if not more than the people they 23 are serving, because they are really doing something 24 positive. And we have to really be inclusive and aligned with the information economy. 25

Alderson Trustpoint Company

1 So many Americans, they really do want to serve but 2 they face obstacles. Some are older. Some have 3 disabilities. But some of those folks are the next 4 generation of coders, cybersecurity experts, but they may 5 not be able to carry that 80-pound pack on their backs. And 6 so we have to find ways to increase opportunities for 7 individuals with diverse abilities so that they can participate and we can benefit from them being in national 8 9 service. So when we open the door to people of all 10 backgrounds, of many ages, we make the most of the amazing 11 skills that Americans bring to the table in service to our 12 country, we strengthen our democracy, we strengthen our 13 national security.

14 So, Mr. Khazei, can you talk to me about how the 15 Federal Government, we can expand their service 16 opportunities for Americans from underserved communities, 17 nontraditional backgrounds, particularly older or those 18 folks with disabilities, through existing national service 19 programs or possibly creating some new ones.

20 Mr. Khazei: Thank you, Senator Rosen. The terrific 21 thing about AmeriCorps is that it is open to people of all 22 ages, and it has great programs from AmeriCorps state and 23 national, the National Civilian Community Corps, to the 24 AmeriCorps SeniorCorps program. And people can serve at all 25 ages, as my colleague, Chairman Heck, said.

1 We have proposed a comprehensive system that starts, as 2 he just said, with civics in school starting in 3 kindergarten, with opportunities for service learning in 4 middle school, summer of service, and a semester of service 5 in high school, as a way to sort of cultivate that energy б and that ethic so that when people turn 18 they can serious 7 consider, should I spend a year in service, whether it is in 8 AmeriCorps, Peace Corp, or the military, or joining public 9 service.

10 One of the things we proposed to expand opportunities 11 is a new service fellowship program. An inspiration for 12 this came from a couple of things, one being in Vinton, 13 Iowa, a small, rural community of just 5,000 people, where 14 we were hosted by Adam Lounsbury, the head of the state 15 commission in Iowa who is doing a great job. And people 16 said, "We love AmeriCorps but we do not have the capacity to 17 do the grants. We do not have the matching funds, the 18 philanthropy here. We have been able to get a few VISTAs." 19 So we said, why not have the fellowship program where the 20 fellows would be fully stipend and their Segal award would 21 be paid for, it will be run through state service 22 commissions where they would certify local nonprofits and 23 people could serve, as my colleague said, right in their own 24 back yard. That is one thing we could do.

25

We also proposed that the stipend and the Segal awards

be raised so that everybody could afford to do it. And we have proposed that there be wraparound services for people that need it, and supports for people who have disabilities.

So our report encompasses the full range. We believe that every single person is an asset and can give back to our country, and we just have to give them the opportunity and the support to do so.

Senator Rosen: Well, thank you. I want to pose this 8 to Dr. Heck. You know, the U.S. is expected to face a 9 10 shortfall of over three million skilled tech workers by next 11 year. How can we leverage junior ROTC and ROTC programs to 12 incentivize and train them? I have a junior ROTC program 13 that was included in NDAA last year, to promote a cyber 14 track for our junior ROTC. But what can we do to help our 15 schools, our school districts, our teachers to really 16 promote junior ROTC and other ROTC programs?

Dr. Heck: Thank you for the question, Senator. Goodto see you again.

We believe that expansion of JROTC is the key. In our recommendations, we call for an almost doubling of the available programs to 6,000 by year 2031, in order to provide more opportunities to high school students to engage in that citizenship program. Also, in last year's NDAA there was a provision to include in existing programs and the curriculum an introduction to options in military,

national, and public service. So there is one area where we can talk about the needs for specific critical skill sets moving forward, perhaps igniting a spark in a young student's mind about the type of career or vocation they may want to pursue upon graduation.

б Certainly in senior ROTC, at the college level, there 7 are opportunities for the cadets to engage in meaningful experiences that expose them to a wide variety of military 8 9 occupational specialties, and so emphasis can be placed on 10 those that are in critical need, at any given time, through 11 that curriculum. Again, the key is to be able to increase 12 opportunities by increasing awareness and by motivating more 13 people to want to serve.

Senator Rosen: Well, I thank you all for being here, for your thoughtful work, and your terrific suggestions. Thank you.

17 Chairman Reed: Thank you, Senator Rosen, and Dr. Heck 18 and Ms. Wada and Mr. Khazei, thank you for a very, very 19 informative hearing that has engaged all of us, and that 20 follows on what I think is an extraordinarily helpful 21 report. The Commission has rendered a great national 22 service, and I want to commend you, and I wish you would get 23 that commendation to your colleagues too.

In fact, you have given us a roadmap, really, as we consider these issues in the next NDAA, and after careful

1	consideration and debate, as we will want to do, we hope we
2	can use that roadmap to get to the place you have pointed
3	to.
4	So, Dr. Heck and colleagues, thank you very, very much,
5	and at this point I will adjourn the hearing. Thank you.
6	[Whereupon, at 11:21 a.m., the hearing was adjourned.]
